# **Proposal: Minecraft Minequest Server for Naron Union**

## <u>Objective</u>

This proposal seeks **761,782 TLM** in funding to establish and operate a **Minecraft Minequest server** for six months. The project will integrate **daily normal quests and special five-day quests** that reward players with **Naron Sample NFTs**, which can be used in a **crafting system to obtain Alien Worlds NFTs**. The initiative promotes **community engagement and NFT burning**, enhancing the **Alien Worlds ecosystem** while introducing new gameplay elements to Naron.

| Expense  | Monthly Cost<br>(TLM) | Total<br>(6 Months) |
|--|-----------------------|---------------------|
| Minequest Service (\$100/mo)                                   | 17,452 TLM            | 104,713 TLM         |
| <b>Minecraft Server Hosting</b> (\$80/mo, 8% discount applied) | 12,845 TLM            | 77,069 TLM          |
| Server & Quest Management (setup, crafting, maintenance)       | 25,000 TLM            | 150,000 TLM         |
| Daily Quest Rewards (1,000 NAR/day)                            | 30,000 TLM            | 180,000 TLM         |
| NFT Acquisition for Naron Reward Boxes                         | _                     | 250,000 TLM         |
| Total Requested  | _                     | 761,782 TLM         |

## Funding Breakdown (761,782 TLM)

USD values calculated using the 2-week low price of TLM on CoinMarketCap: \$0.00573

#### **Implementation Plan & Timeline**

- Upon Approval: A new Minecraft multiplayer server will be deployed.
  - Minequest services will be secured for six months.
  - Initial server configuration & quest setup will begin.
- Within 7 Days:
  - The server will be tested to ensure **quest tracking and reward automation** function correctly.
  - Official launch announcement will be made in Alien Worlds Discord and other community channels.
- Ongoing (6 Months):
  - **Daily quests** will reward **1,000 NAR per day** (distributed equally among participants).
  - Five-day quests will award Naron Sample NFTs, which can be used to craft a Naron Reward Redemption NFT.
  - Crafting system will burn the Naron Sample NFT plus Alien Worlds NFTs, allowing players to obtain Naron Reward Boxes containing random Alien Worlds NFTs valued at a minimum of 7.5 WAXP.
  - Regular **updates and adjustments** to quests, crafting recipes, and reward pools based on engagement and cost fluctuations.

### Server Mechanics & Engagement Strategy

- Daily Quests:
  - Automatically tracked and rewarded via Minequest services.
  - **Bonus quests** will replace any missed daily rewards.
- Five-Day Quests:
  - More gameplay-intensive, rewarding Naron Sample NFTs required for crafting.
- NFT Burning & Crafting System:
  - Crafting recipes will require Alien Worlds NFTs as ingredients, burning them in the process.
  - Estimated crafting cost: **5 WAXP per recipe**.
  - Reward Boxes guarantee Alien Worlds NFTs valued at a minimum of 7.5
    WAXP to ensure fairness.
  - Recipes will be updated if costs exceed rewards.
- Server Environment:
  - No mods—focus on pure Minecraft gameplay.
  - Designed for engagement and sustainability, integrating Alien Worlds mechanics in a fresh, interactive way.

## Community Benefits

**Engages both Alien Worlds and Minecraft communities**, driving interaction and retention.

**W** Burns Alien Worlds NFTs, reducing supply and increasing scarcity.

**V** Provides fair and transparent rewards, ensuring long-term sustainability.

**W** Creates a structured, rewarding experience for both casual and dedicated players.

Strengthens Naron Union's role as an innovator in Alien Worlds' decentralized gaming landscape.

This **Minecraft Minequest integration** functions as both a **community-building initiative and an NFT-burning mechanism**. It is designed to be in line with the **decentralized storytelling and gamification goals of Alien Worlds**.

By funding this proposal, the Naron Union will pioneer a unique engagement strategy, merging blockchain gaming mechanics with a proven, widely enjoyed multiplayer experience.

#### <u>Appendix:</u>

Important to note is that the 2-week low of TLM was used (as seen on CoinMarketCap) due to the fact that TLM has aggressively moved down in recent weeks. It provides the room for fluctuation so by the time funds are received it would not be under-funded since the prices for the services are calculated in USD. If any, overhead funds would be allocated first to provide wallet resources (RAM/CPU/NET) for the crafting recipes and NFT acquisition, with the remainder to be allocated to rewards.
